Your home - your way

The right windows and doors can transform how a home looks, feels and performs, enhancing comfort, efficiency and everyday living.

The Safeguard Collection combines refined styling with modern design to create windows and doors that offer exceptional performance. With a wide choice of styles, colours and hardware options, every installation is tailored to complement the character of your home.

Designed and manufactured in Britain, Safeguard windows and doors offer lasting quality, dependable performance and timeless appeal.

Energy efficiency built in

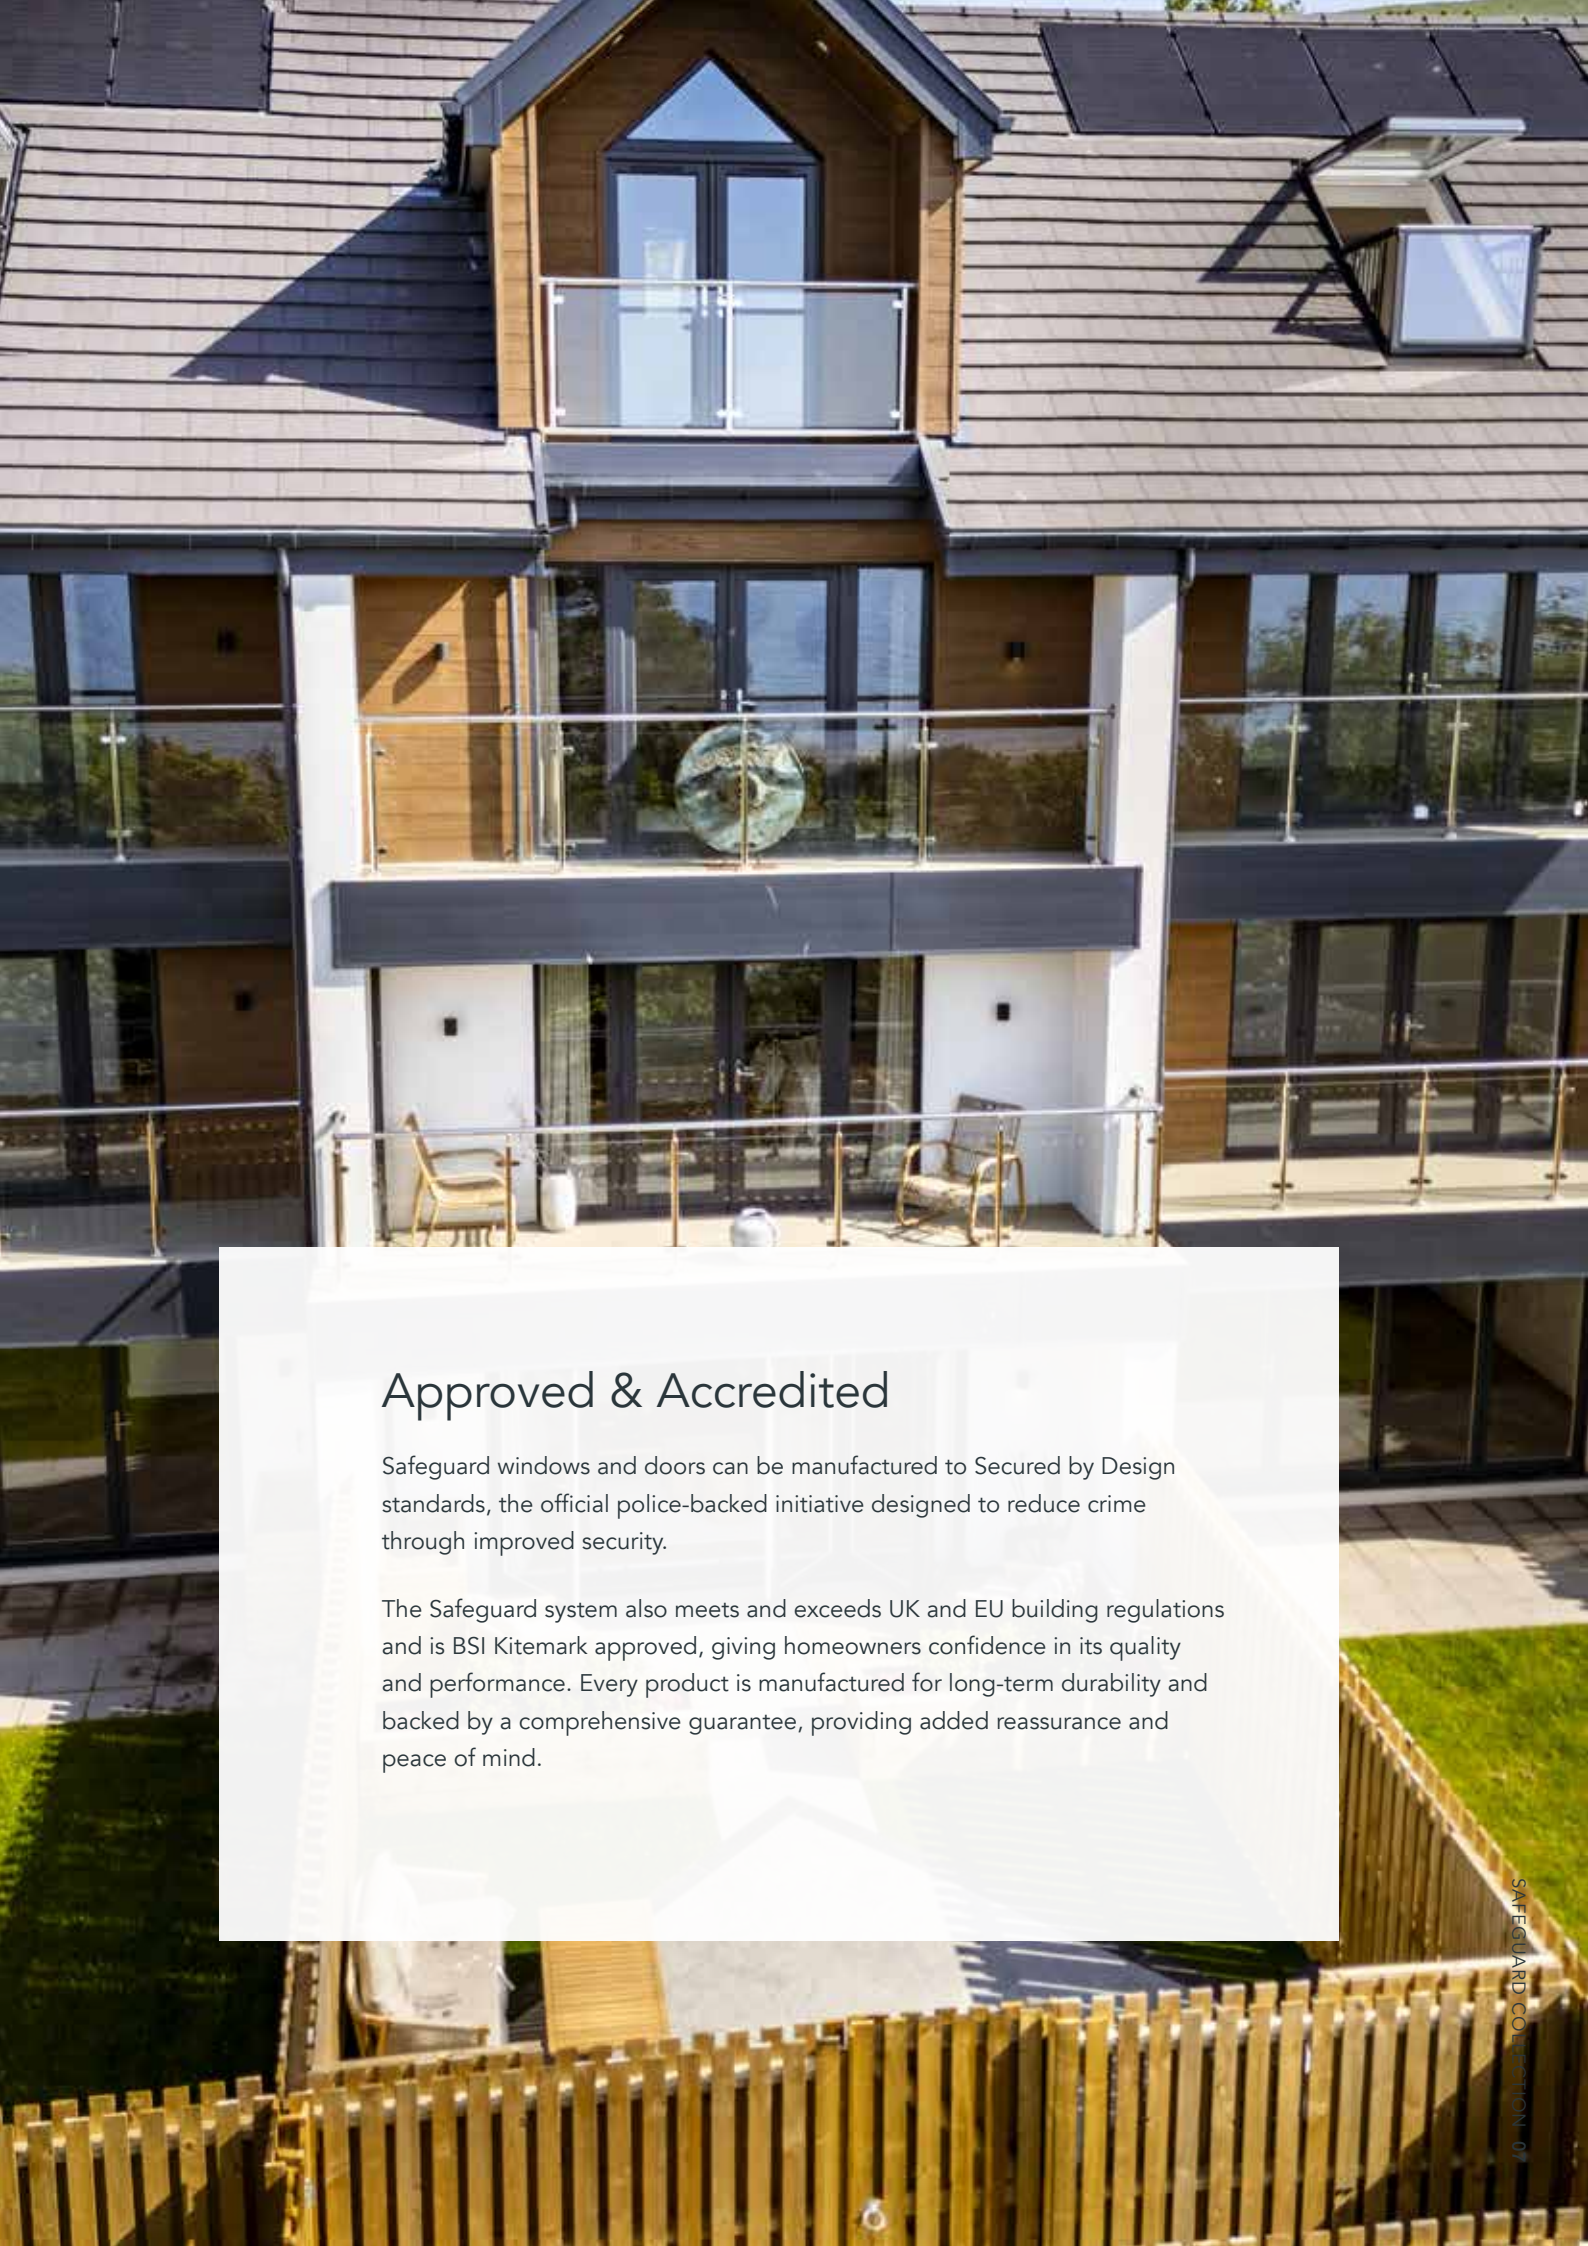

Every Safeguard window and door is designed to improve comfort and energy efficiency.

High-performance glazing helps retain warmth, while multi-layer sealing systems protect against draughts and weather.

Thermal performance is measured using the British Fenestration Rating Council system, giving homeowners a clear way to compare efficiency. Safeguard products can achieve ratings of up to A+, and / or U-Values as low as 0.84 W/m²K, helping reduce heat loss and maintain a comfortable home environment.

The result is a home that stays warmer, quieter and more energy efficient throughout the year.

Approved & Accredited

Safeguard windows and doors can be manufactured to Secured by Design standards, the official police-backed initiative designed to reduce crime through improved security.

The Safeguard system also meets and exceeds UK and EU building regulations and is BSI Kitemark approved, giving homeowners confidence in its quality and performance. Every product is manufactured for long-term durability and backed by a comprehensive guarantee, providing added reassurance and peace of mind.

Casement windows

Elegant, versatile and designed for modern living, casement windows remain one of the most popular choices for the home.

Safeguard casement windows feature slim, sculptured profiles that maximise natural light while maintaining a balanced appearance inside and out. Durable, low-maintenance finishes help keep your windows looking their best, while advanced glazing improves insulation and energy efficiency.

A wide range of configurations makes it easy to tailor each window to suit your home, from simple openings to larger bay arrangements. Optional Astragal Bars provide additional character for more traditional properties.

For added reassurance, Safeguard casement windows are fitted as standard with Yale SensCheck™ Smart compatible hardware, offering the option to enhance home security even further.

Using 40mm Regency Triple® featuring Corning® Enlighten™ Glass, Safeguard Casement Windows can achieve an industry-leading overall frame U-value of 0.84 W/(m²K). See page 22 for more details about our revolutionary glass options.

Tilt and Turn windows

Tilt and turn windows offer a practical, modern solution for ventilation, access and easy cleaning.

Operated by a single handle, the window can tilt inwards slightly for secure ventilation or open fully inwards, allowing safe and convenient access to the outside glass from inside your home. This makes them ideal for upper floors or apartments where outward opening windows aren't suitable.

Highly insulated and designed to withstand the elements, Safeguard tilt and turn windows provide reliable performance with minimal maintenance.

Closed

Tilt

Tilts inwards for secure ventilation.

Turn

Opens fully inwards for easy cleaning.

Residential doors

Residential PVC-U doors combine durability, security and everyday practicality, making them ideal for modern homes.

Reinforced frames and multi-point locking systems provide dependable security, while insulated panels help keep your home warm, quiet and protected from the elements.

Durable, low-maintenance finishes maintain their appearance year after year, with no ongoing upkeep required.

A wide choice of styles, panel designs and finishes allows you to create a door that complements the character of your home. Matching glazed side panels are also available to create a brighter, more impressive entrance.

For added reassurance, Safeguard residential doors come fitted as standard with Yale SensCheck™ Smart compatible hardware, giving you the option to enhance your home security even further.

Composite doors

Composite doors combine the character of traditional timber with the strength and reliability of modern materials.

A solid insulating core and durable outer skin provide excellent strength, thermal performance and long-term durability, helping keep your home warm, quiet and protected from the elements.

Designed to withstand the British climate, composite doors won't warp, swell or shrink with changing weather conditions.

Available in a wide choice of styles, colours and realistic wood-effect finishes, they make it easy to create an entrance that complements your home.

For added reassurance, Safeguard composite doors come fitted as standard with Yale SensCheck™ Smart compatible hardware, giving you the option to enhance home security even further.

French doors

French doors bring light, openness and a natural connection between your home and garden.

Safeguard French doors combine timeless design with durable PVC-U profiles, advanced glazing and highly secure locking systems to deliver lasting performance with minimal maintenance.

Slim frames maximise natural light and create clear views of your outdoor space, while inward and outward opening options allow the design to suit your home and layout.

Available in a wide choice of finishes, glazing styles and detailing, they make it easy to create a look that complements both traditional and contemporary properties.

For added reassurance, Safeguard French doors come fitted as standard with Yale SensCheck™ Smart compatible hardware, giving you the option to enhance home security even further.

PatioMaster™ Sliding doors

PatioMaster™ sliding doors open up your living space, bringing more natural light into your home and creating a seamless connection between indoors and out.

Smooth-gliding panels move easily along precision steel tracks, making them simple to operate while delivering reliable everyday performance. When closed, advanced glazing helps retain warmth, reduce outside noise and maintain a comfortable living environment.

Available in a range of configurations, PatioMaster™ sliding doors can suit openings of many sizes, from compact homes to larger contemporary spaces.

Designed to maximise light and space, they offer a stylish and practical solution for modern living.

Safe: Designed and tested to meet building regulations, with toughened safety glass for added reassurance.

Secure: Multi-point locking systems, steel-reinforced frames and advanced security features help protect your home.

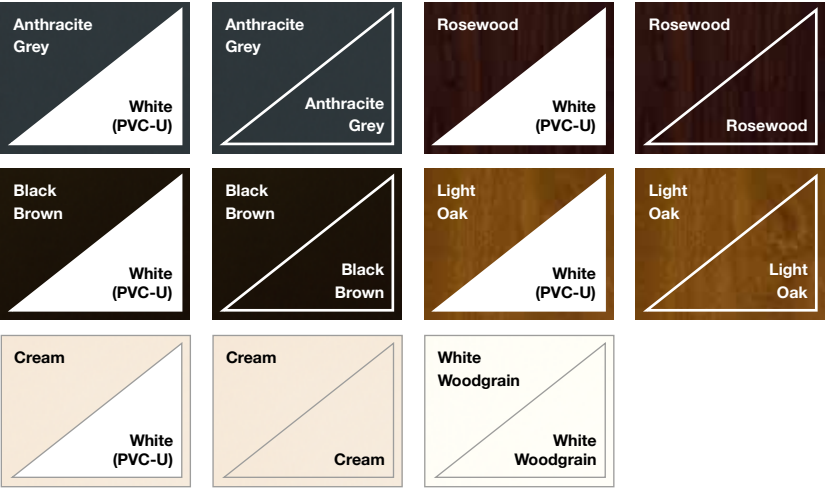

Sophisticated: Slim, streamlined design and smooth operation create bright, open living spaces with uninterrupted views.

Colours

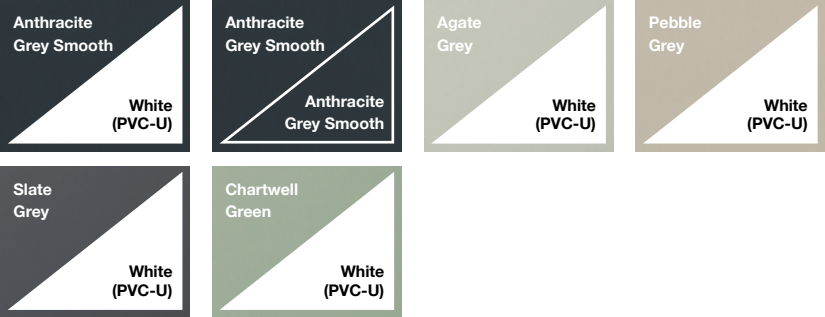

Colour has become an important part of how homeowners express their style, adding individuality and character to both doors and windows. The Premium and Premium Plus ranges bring together 18 carefully selected colour combinations, chosen to complement a wide variety of property styles.

Whether your preference is to make a statement or to blend seamlessly with your surroundings, there's a finish to suit your home. From subtle, understated tones to richer, more distinctive shades, each option has been selected to enhance the overall look while maintaining a refined, lasting appearance.

Premium finishes

Premium Plus finishes

Signature finishes

Hardware

The finishing touches can make all the difference. Today, homeowners expect more choice, allowing every detail — from handles and numerals to letterplates and hinges — to reflect the style of the property.

For modern homes, clean, contemporary hardware creates a crisp, confident look. For period properties, traditional designs help retain a sense of heritage and authenticity. Whatever your preference, the right details bring everything together.

A wide range of colours and finishes allows you to personalise the final appearance, whether that means making a bold statement or choosing something more subtle and timeless. What remains consistent is the quality. Every piece of hardware is selected for its durability, smooth operation and lasting finish — details you'll appreciate every day.

High-performance glazing

The glass in your windows and doors plays an important role in both comfort and energy efficiency. High-performance glazing helps retain warmth, manage light and maintain a comfortable home throughout the year.

Safeguard offers a choice of glazing options to suit different levels of performance.

Planitherm Total+

Planitherm Total+ offers an excellent balance of insulation and natural solar warmth. It helps retain heat inside your home while allowing sunlight to pass through the glass, creating a bright and comfortable living space.

Planitherm One

Planitherm One is designed to maximise thermal insulation. Its advanced coating helps keep more warmth inside the home, improving energy efficiency and maintaining a consistent indoor temperature.

Triple Glazing

Regency Triple® featuring Corning® Enlighten™ Glass is an advanced, next generation triple glazed unit. By using ultra-thin 0.5mm Corning® Enlighten™ glass as the middle pane, this next generation unit delivers the high performance of conventional triple glazing, whilst being only around 5% heavier than a conventional double-glazed unit, lowers heat loss through windows by 60% compared with standard double glazing. This helps reduce heating bills and make homes more energy efficient.

regency | glass |
the difference is clear

Understanding performance

Glazing performance is measured using U-values, which indicate how well a window retains heat. The lower the U-value, the better the insulation.

Modern glazing technology allows Safeguard windows and doors to achieve excellent thermal performance while maintaining clear, natural light.

Choosing the right option

Planitherm Total+

Balanced performance
and natural warmth

Planitherm One

Maximum thermal
insulation

Triple Glazing

The highest level
of energy efficiency

By introducing a third pane of glass, triple glazing improves heat retention even further, helping to:

- Reduce heat loss
- Improve energy efficiency
- Create a more stable indoor temperature
- Support lower running costs over time

Yale Lifetime Total Trust Guarantee

Yale is one of the most trusted names in home security, renowned worldwide for innovation, reliability and quality. In addition to this reputation for excellence, Yale offers an outstanding Lifetime Total Trust Guarantee on its PAS 24-compliant hardware, giving homeowners lasting confidence in the protection of their home.

Safeguard & Yale – A Secure Partnership

Together, Safeguard and Yale deliver the ultimate blend of security, performance and peace of mind. With elegant styling, excellent insulation, durable weather protection and low-maintenance design - backed by Yale's Lifetime Total Trust Guarantee - Safeguard doors and windows provide superior protection and reassurance for years to come. Should Yale hardware fail under attack, the guarantee includes:*

- Up to £2,000 towards home insurance excess
- Up to £1,500 for repairs or replacements
- £1,000 compensation
- £500 refund on call-out fees

It's an added layer of confidence, built into every detail — combining trusted operation with meaningful protection you can rely on, year after year.

Shootbolt window lock

Maximum security with minimal fuss.

Both versatile and secure, the shoot bolt and adjustable mushroom cams provide increased anti-separation performance, together with simple compression adjustment. Plus, enjoy added peace of mind with Yale's fantastic Lifetime Total Trust Guarantee. *Terms and conditions apply.

Night vent facility.

There is a night vent facility on both the standard casement and flush casement windows, allowing you additional ventilation whilst the window is partially open.

SensCheck™ compatible. Check the status of your home, anytime, anywhere

Yale 8 locking system

The advanced multi-point locking system for PVC-U doors.

The Yale 8 range of advanced multi-point locks has been designed exclusively for Safeguard to achieve a superior locking solution for PVC-U hinged doors.

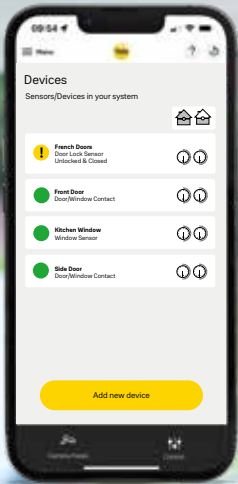

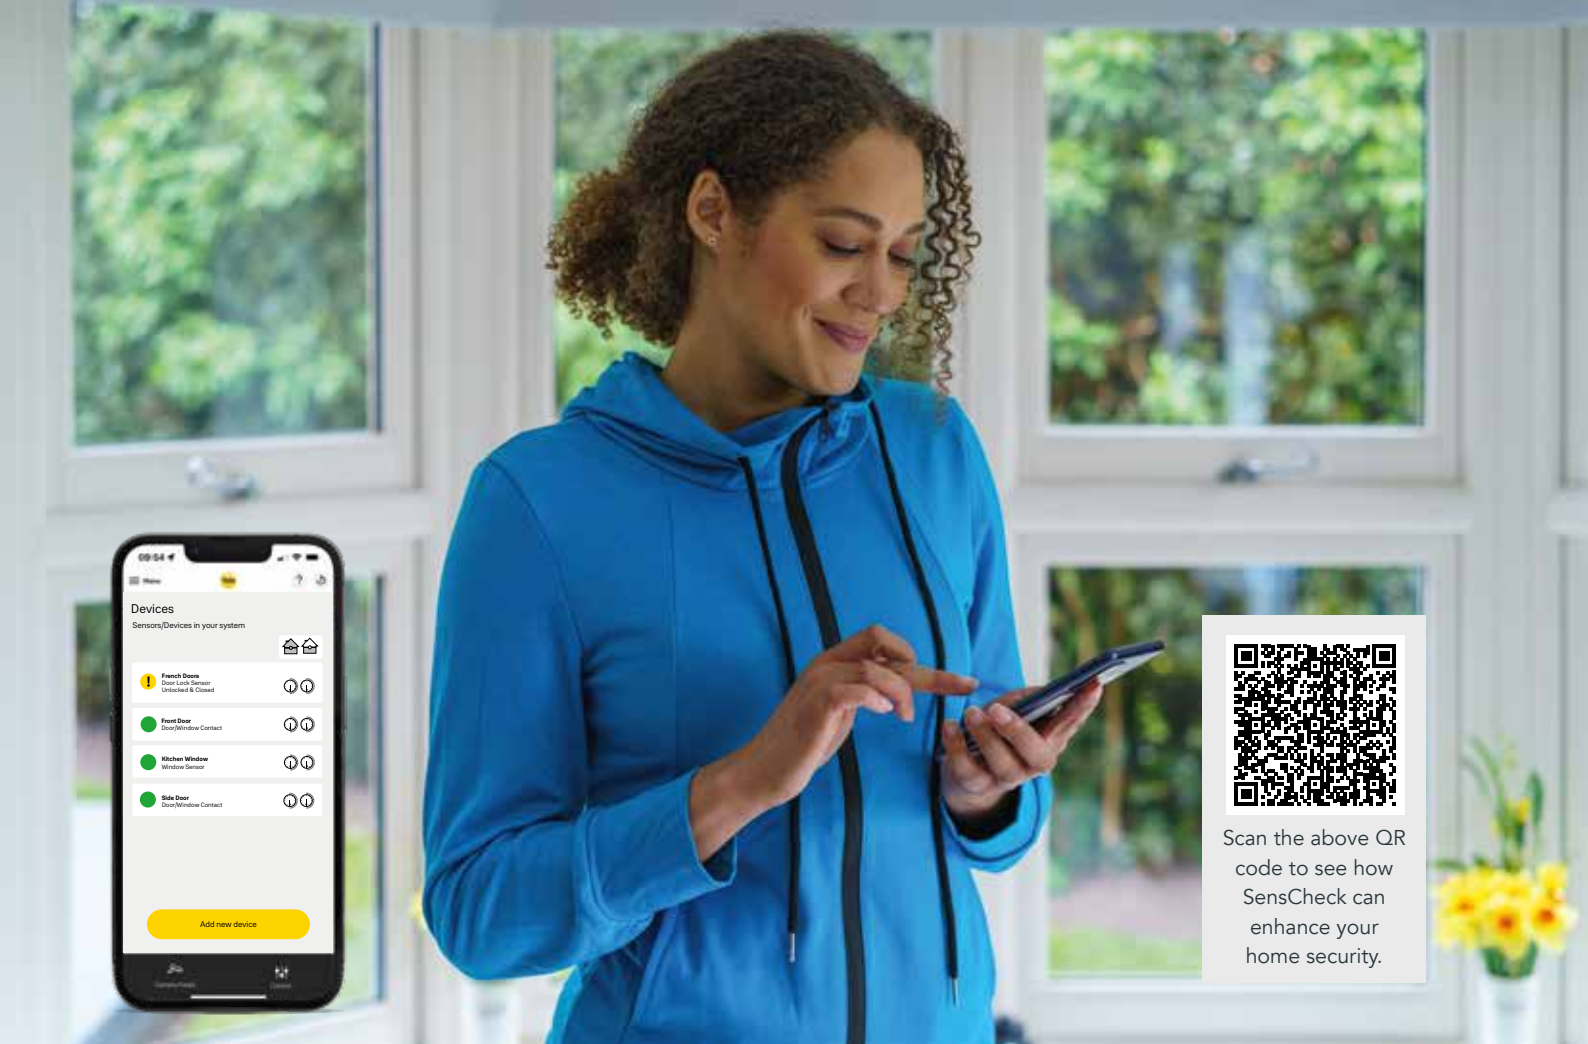

The Yale 8 range offers smooth and easy operation, providing effortless lock engagement and a greater degree of security than conventional roller and bolt door locks. Incorporating all stainless steel main components, the Yale 8 range provides excellent durability and corrosion resistance.

Safeguard 3 Star protection

Advanced protection, built into every door.

Security is at the heart of every Safeguard door. That's why they are fitted with the Ultion 3 Star PLUS cylinder with ALPS technology, designed to protect against modern break-in methods.

The advanced cylinder helps defend against snapping, drilling and picking, while also providing protection against more sophisticated attacks such as thermal manipulation and twisting.

Built for both security and durability, the lock also features strong precision-cut keys and key control technology to help prevent unauthorised copies.

For added reassurance, Ultion locks are backed by a £5,000 homeowner guarantee, providing extra confidence in the protection built into your Safeguard door.

ULTION ALPS PLUS

£5000 SECURITY GUARANTEE

PREVENTS THERMAL MANIPULATION ATTACKS.

Whilst we can't stop unwanted elements entering the lock, the ALPS exhaust ports stop it sticking around.

SNAP STOP

Stops lock snapping in its tracks. After a snapping attack the SnapStop is fired preventing access and manipulation of the core.

TWIST TRAP

Blocks devastating twist attacks. The rotator is instantly fired into the ALPS TwistTrap when the lock is twisted keeping the 'Always Locked' status.

NO DRILLING

Our strongest anti-drill protection. Ever. Our most formidable defence yet with 16 hardened steel points of drill protection.

DURABLE KEYS

Our famous thick Ultion keys are precision-cut and are 60% thicker than the rest of the market, meaning more resistance to snapping & bending.

PEACE-OF-MIND

Protected by our £5000 Guarantee Ultion is so confident in our locks that we'll put our money where our mouth is — £5000 to be exact.

EXTRA SECURITY

Peace-of-Mind with Key Control
Prevent your keys from being copied without your permission with Ultion Key Control.

Ultion KeyTag*

You'll never have to look for your keys again. Powered by the Apple Find My app, KeyTag is the easiest way to track down your keys.

Ultion Lubricant*

Keep your locks in shape. Our famous lubricant keeps your locks locking.
